Ehcolo Container Unloader

Front and back view of the unloading unit on its support:

- large hatches to access the liner (with safety switches)
- leakage air collector from rotary valve
- product detection switch under cover above central outlet
- access to central part of screw conveyor
- manual sliding valve and leakage air collectors
- rotary valve with connections from blower and to silo loading pipe
- central post to enhance rigidity of the unit and maintain retention bars in position during tilting of CTN
Moving the unloader by a forklift to the open CTN, hanging it into the upper twist locks and securing it by the lower twist locks.
Ready to start unloading …
